Journey Back

Home Program

Hundreds of NDIS participants are left waiting for long, uncertain periods of time in hospital beds while they are medically ready for discharge.

160

Days is the average wait time for people on the NDIS to be discharged from hospital

1,834

Participants in hospital are medically ready for discharge. That is 59% of all NDIS participants in hospital

#1

The number one reason for these delays is participants waiting for the NDIA to process paperwork.

No one wants to spend a day longer in hospital than they need to.

At Easy Living Care Solutions, our *Journey Back Home* program assists NDIS participants stuck in hospital to finally leave the hospital and reintegrate back into their normal, free everyday life.

We provide a transitional bridging solution by supporting participants while their long-term and permanent housing is being arranged. In the process we help participants build back up their independence.

A smooth transition out of hospital is ensured by collaborating with all relevant stakeholders to make sure all participants are suitably supported throughout.

Participants who are NDIS funded for STA, MTA or SIL are eligible to join our *Journey Back Home* program. Call us today to discuss your possible transition out of hospital.
